Zyter TruCare

True Care. Any Time. Anywhere.

Reimagine Healthcare: Experience Zyter|TruCare's Value-Based Revolution

The intricacies of modern healthcare demand an agile and high-performance ecosystem capable of harnessing cutting-edge technology to deliver superior care, all while significantly reducing expenses—whether it's within the comfort of a patient's home or beyond.

At the heart of this healthcare revolution stands Zyter|TruCare, a catalyst poised to unlock the full potential of value-based care. Through its cutting-edge technology and comprehensive services, Zyter|TruCare bridges the gap between clinical and financial data, thereby generating invaluable insights that fuel tangible strides in care quality.

"The ZTC team has been incredible. I can't thank you enough for your commitment to Capital and helping to plow through some very difficult challenges."

Scott Frank

Senior Vice President & CIO
Capital Blue Cross

Leveraging Next-Generation Solutions to Improve Outcomes & Reduce Risk

Zyter|TruCare offers purpose-built software and services for payers, providers, and public health organizations to manage value-based care delivered to anyone, from anywhere, at any time.
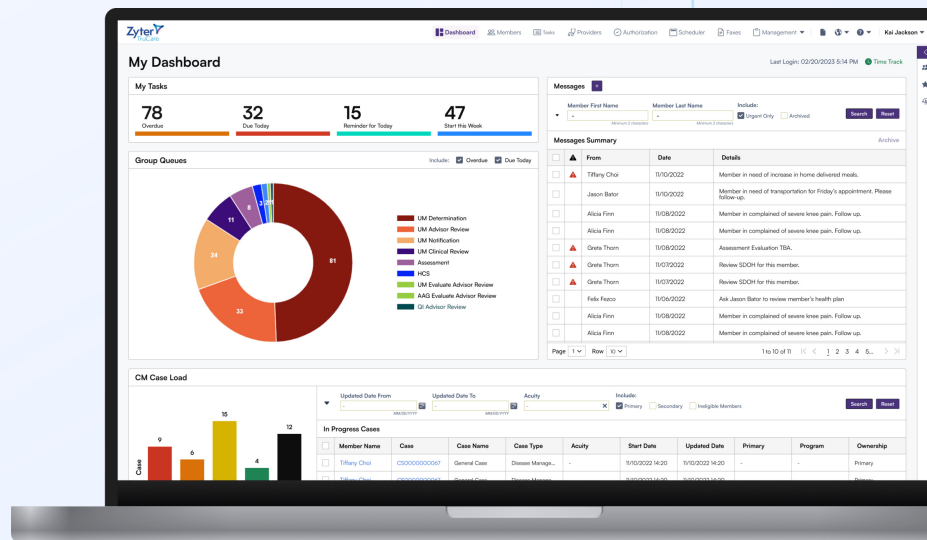

Our solutions unite Care Management, Utilization Management, Telehealth, Remote Patient Monitoring, Social Determinants of Health, Value-Based Care Performance Analytics, and more on a single platform, with intelligent wrap-around services.

Our compliant and scalable product lines fall into five main categories:
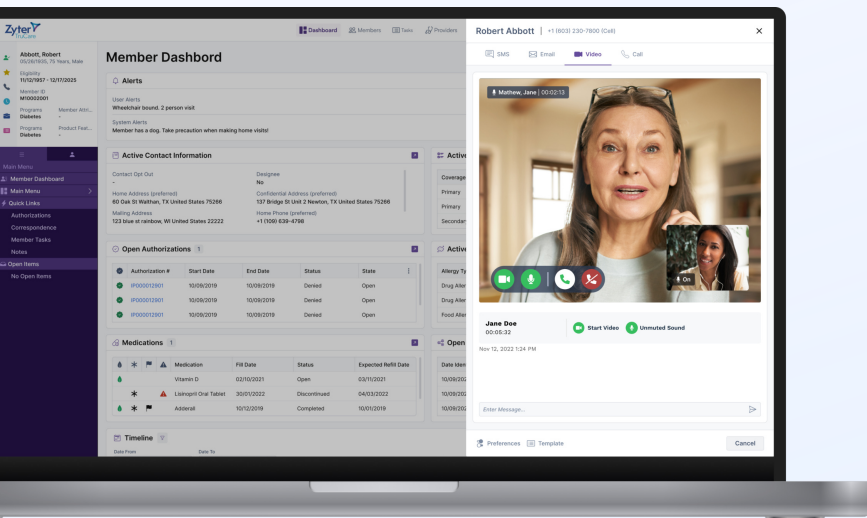

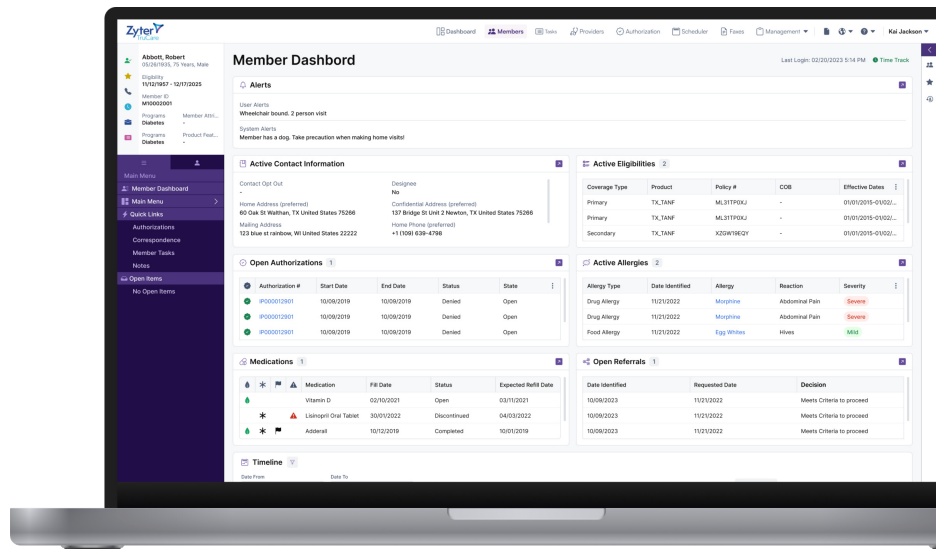

Insights Health

Insights Health brings outcomes and performance management into focus on where and how to intervene across patient and member populations to ensure quality care while reducing unnecessary costs. It helps gain unparalleled visibility into your provider network's performance, optimize resource allocation, and elevate patient care to new levels of excellence.

It enables the measurement and evaluation of healthcare providers' performance based on the value delivered to patients and members. The result is a healthcare organization that is more patient/member-centered, efficient, and effective in improving population health while lowering costs.

Population Health

The Population Health Management platform enables you to manage your members and patients effectively, improve outcomes, and lower costs. We consolidate your case, care, disease, utilization, referral, and medication management programs into a single platform with collaboration tools designed for team efficiency, productivity, and compliance. Our solution helps health plans and risk-bearing entities deliver efficient and quality care, reduce unnecessary utilization, and positively impact the health of populations.
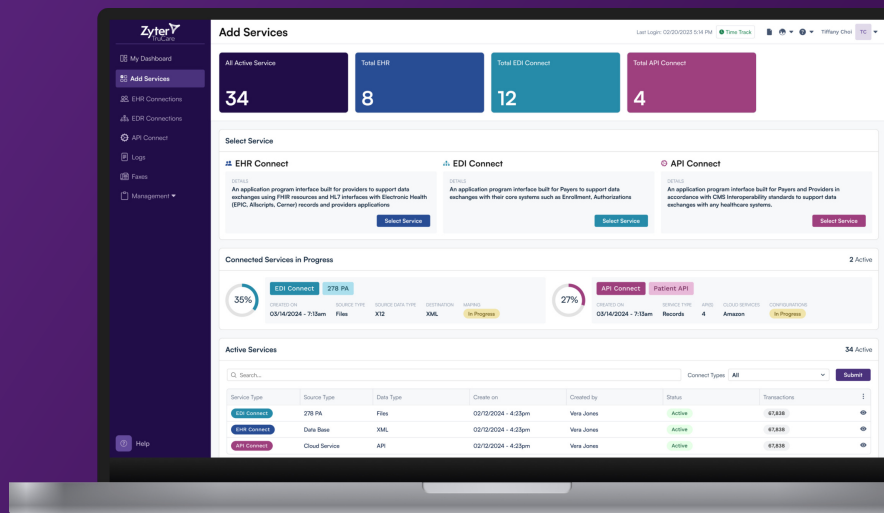

Virtual Health

Virtual Health solutions enable healthcare organizations to provide value-based care from anywhere, anytime. This suite of products helps providers and care-providing entities deliver efficient and effective care in the convenience of the patient's home. It allows caregivers to intervene promptly and prevent patient complications by monitoring vital signs and other health metrics through remote data. Since it enables patient engagement from any digital application, our solution helps manage caregiver workloads more efficiently, reduces administrative burden, and makes it easy to collaborate with patients.

Connected Health

Connected Health solutions enable healthcare organizations with out-of-the-box integration tools to facilitate compliance with required Centers for Medicare & Medicaid Services interoperability rules, including patient access APIs, provider directory APIs, and payer-to-payer data exchange.

We offer a complete FHIR® solution with FHIR® 4.x support and over 1,300 formats and data elements mapped. Our solution is also deployable by our experienced technical teams, with an A+ rating for on-time, on-budget implementations.

Services

Zyter|Trucare industry experts work with your teams to drive digital transformation, helping your teams determine the model that best fits your organization and your strategy. We offer Success, Support, and Managed Services - along with our world-class software.

Zyter|Trucare's Success Services comprise multiple complementary disciplines, including Program Management, Business Consulting, Clinical Consulting, Technical Consulting, and Training. In addition, we also offer comprehensive software support services and managed services for your technology needs.

Partnership Philosophy

"We are relentless in our commitment to customer service and partnership because we understand that ultimately, this benefits our client's ability to improve their member's health outcomes."
